ft_transcendence (Capstone Project)
Pointers for Staff Evaluation of the Capstone Project

This will serve as your reference for the Staff Evaluation of your Capstone Project but is not limited to the following.

Recommended PPT content:
1. Introduction (Brief idea of the Capstone Project)
2. Selected Modules
3. SDLC models used for the software development
4. Coverage/Content/Features of the application
5. Contribution of each member to the application development
6. Limitation of the developed application
7. Recommended further improvement of the application

Pointers to consider:
- You will be given time to do your presentation, every member must be given part in the actual presentation.
- You can be interrupted by the staff to ask some questions or clarifications in any section of the presentation.
- You will be asked what are your contributions to the development of the application/game, you are expected to provide your contributions and explain each task/program code, and/or you can do a demonstration if asked.
